Personal Statement

I am a graduate from Napier University with a BSC (HONS) degree in Web Design & Development. I am looking to put my skills which have been gathered from my time in education to work by joining a company that can bring out the best in my abilities.

The goal I have now set myself since graduating is to work in a great environment which can provide future opportunities & allow me to put my skills to use.

Hobbies

PC Gaming (FPS, RPG, MMO), Movies/TV Shows, Football, eSports, Fitness & Coding/Designing (HTML, CSS, JavaScript, Bootstrap).

Skills

HTML, CSS (SCSS), JavaScript, Bootstrap, User Experience, Adobe Suite, Ability to Work Under Pressure, Creativity, Teamwork, Communication, Prototyping & Wireframing.

Featured Projects

Little Boxes (GitHub Link):

> Using the A-Frame framework for creating VR elements in the browser I developed this game as my honours project looking at how user experience can be improved by little or sometimes big changes in the way the user interacts with the experience. This was created using; HTML, CSS, JavaScript & Bootstrap for the programming side and using blender glTF 3D models were created for the environment.

BDO Wiki (GitHub Link):

> This project was created as a Python Flask application that I was tasked to develop a large-scale website that used Flask, HTML, CSS, JavaScript, JSON & PHP. What was created was a website that resembled a wiki for a popular MMO Black Desert Online that rendered information on all the different types of classes, locations & skills throughout the game.

Education

BSC (HONS) Web Design & Development
Edinburgh Napier University
Classification: 2:1
September 2016 to May 2019

Keys skills gained:

- Ability to work to deadlines

- Stronger communication between working groups
